

Hello,

I have noticed that the date for submissions has past but would appreciate you considering my submission.

I would like to put forward a submission regarding the inclusion of Nutritional Medicine graduates as registered practitioner members of ARONAH.

I believe that Nutritional Medicine graduates are being ignored in the Complementary Medicine field even though the training undertaken is as extensive as Naturopathic training excluding herbal medicine. Nutritionist offer a valuable service to the community and by being included in the registration body will help to ensure that the public is receiving treatment from an appropriately qualified practitioner.

Regards,

Kaye Brydson
